

# Study Verification Test

Campus: AAL

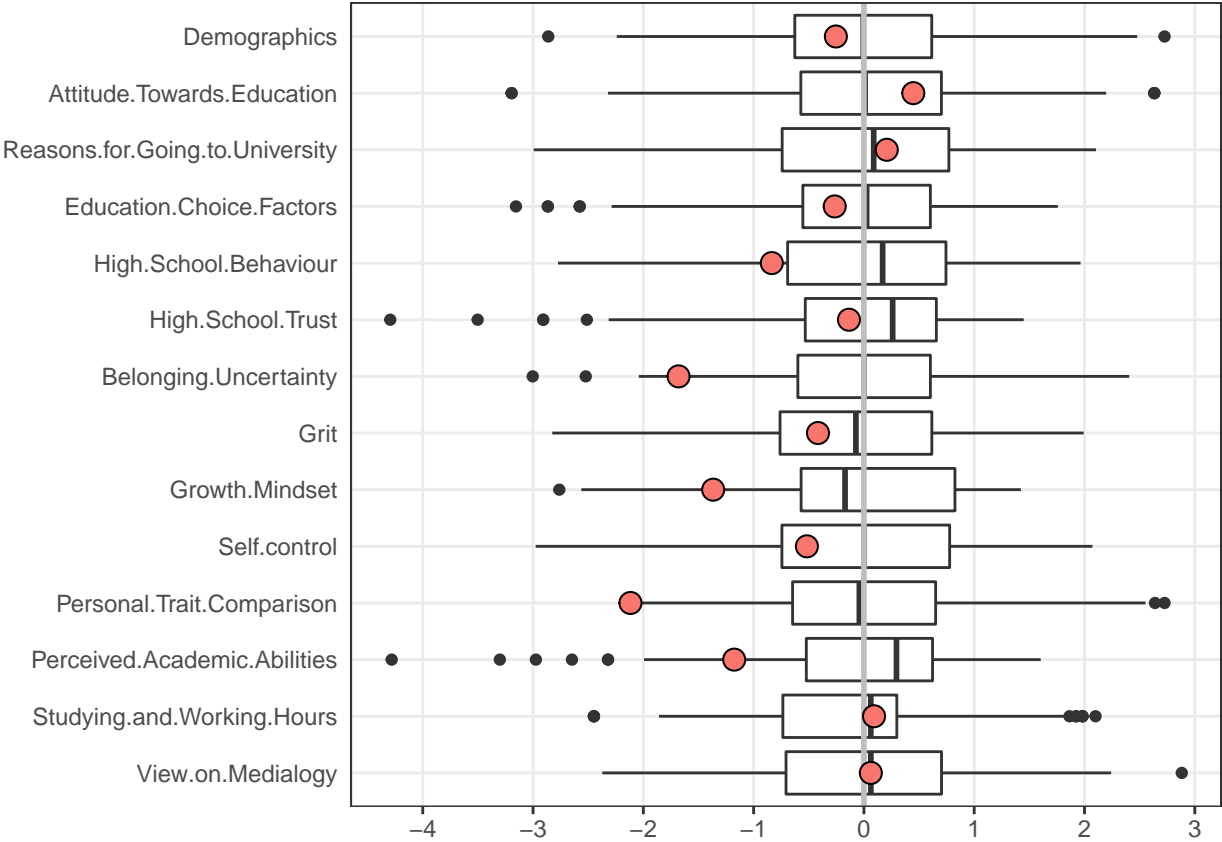

Student: Andrei0Iuliu Lucaci

## Student Report

This is an interpretive report of your responses to the Study Verification Test. Its purpose is to help you identify your student profile within specific topics.

The percentile ranks show how you compare to a larger sample of first semester Medialogy students from Aalborg and Copenhagen. Specifically, they indicate the percentage of students whose scores are equal to or less than yours. The percentile is also indicated with a dot in the boxplots where the x-axis show the number of standard deviations away from the mean ( $m = 0$ ).

As the report is based on questionnaire information alone, it may give only a rough indication of your true attitudes. Your advisor or counselor will help you understand your scores and find the services you desire.
